Omaha 7, Nebraska

Dear Mr Wesolowski:

I received your letter of Octobef 20 reporting reception of KYNT, on that date. According to the station log the programming which you report coincides with what was broadcast from 11:44 P.M. to 12:02:10. This will serve as verification of your reception of this station.

Kynt is a 250 watt, local channel station on 1450 kc, using an RCA 250-M transmitter with 2 813's for finals, feeding a shunt-fed quarter wave tower 174 feet tall. The studios are located a mile north of the city limits, and the transmitter, which is operated by remote control is about 2 miles south west of the studios.

I'm afraid coverage maps are at a premium around here. I'm sorry I can't find an extra to send along.

Thanks for the report, and good luck in your DX'ing.

Sincerely,

John C. Briggs, C.E.
